Thank goodness for Goodman.™

Glossary of Terms

Auto-Changeover: A mode in which the thermostat will turn on the heating or cooling based on room temperature demand.

Cool Setpoint: The warmest temperature that the space should rise to before cooling is turned on (without regard to deadband).

Deadband: The number of degrees allowed past setpoint, before energizing heating or cooling.

Differential: The forced temperature difference between the *heat setpoint* and the *cool setpoint*.

Heat Setpoint: The coolest temperature that the space should drop to before heating is turned on (without regard to deadband).

Icon: The word or symbol that appears on the thermostat display.

Mode: The current operating condition of the thermostat (i.e. Off, Heat, Cool, Auto, Program On).

Non-Programmable Thermostat: A thermostat that does not have the capability of running *Time Period Programming*.

Programmable Thermostat: A thermostat that has the capability of running *Time Period Programming*.

Temperature Swing: *Same as Deadband*.

Time Period Programming: A program that allows the thermostat to automatically adjust the *heat setpoint* and/or the *cool setpoint* based on the time of the day. *Same as Schedule.*

Care and Use of Your Thermostat

Pencils, pens and other sharp objects should never be used on your TouchScreen thermostat; these may damage your touchscreen. Only use your finger tip to press the touchscreen buttons.

Use a soft, damp cloth to clean the screen.

DO NOT USE ABRASIVE CLEANERS OR CLEANERS THAT CONTAIN SOLVENTS. DO NOT SPRAY ANYTHING DIRECTLY ONTO THE THERMOSTAT.

Quick Start

Temperature, Modes & Fan

Selecting Your Desired Temperature and Mode

Press WARMER **or** COOLER **to adjust temperature**

The Heat or Cool Setpoint is the temperature the room has to reach before heating or cooling will turn on.
(Without regard to deadband)

Cool Setpoint

Warmer Button

Fan

Cooler Button

Heat Setpoint
Press MODE **or the MODE Icon** ⚙

HEAT will allow only heat operation.

COOL will allow only cool operation.

AUTO will allow both Heat and Cool operation.

OFF - heating and cooling systems are turned off.

AUTO-CHANGEOVER MODE - Pressing the WARMER or COOLER buttons in Auto mode will adjust **both** the heat and cool setpoints simultaneously. To adjust heat and cool setpoints individually, choose HEAT mode to adjust the heat setpoint and COOL mode to adjust the cool setpoint, then return to AUTO mode.

HEAT OR COOL MODE - Pressing the WARMER or COOLER buttons in Heat or Cool mode will adjust only the heat **or** cool setpoints.

Using the Fan Button

Press FAN **or the FAN Icon** ✺

FAN ON fan runs constantly even in OFF Mode.

FAN AUTO fan only runs with a heating or cooling demand.

Page 33

• **Installation Settings**   ▶   (Continued)

• Timers & Deadbands   ▶   (Continued)

**The Deadband is the number of degrees or minutes that the
thermostat waits before it initiates the stages of heating or cooling.**

1st Stage Deadband Specifies the minimum temperature difference
between the room temperature and the desired setpoint before the first stage
of heating or cooling is allowed to turn on. For example, if the heat
setpoint is 68 and the 1st Stage deadband is set to 2 degrees, the room
temperature will need to drop to *66 degrees* before the heat turns on.

• **1st Stage Deadband** $(2°)$ ▶

(1 - 6 deg. F)

• **2nd Stage Deadband**   ▶

• **2nd Stage Deadband** $(2°)$ ▶

Number of degrees past 1st stage before 2nd stage turns on. (0 - 10 deg. F)

• **2nd Stage Timer**   (2mins) ▶

Number of minutes past 1st stage before 2nd stage turns on. (0 - 60 mins.)
(The 2nd stage deadband must also be met)

• **2nd Stage Turnoff Point**   (Deadband) ▶

Deadband or Setpoint.

• **3rd Stage Deadband** ▶	**3rd and 4th stage deadband settings are the same as 2nd stage.**
• **4th Stage Deadband** ▶	

The Main Menu Buttons

• Installation Settings ▶ (Continued)

• Free Cooling ▶

Free Cooling is an energy saving way to boost the efficiency of your air conditioning system by bringing in cool air from the outside. The installation of a Free Cooling damper(s) and outdoor temperature sensor is required.

| • Free Cooling - DISABLED | **(See page 49 for wiring diagram)** |

• Free Cooling - ENABLED ✓

Turns on Free Cooling.

• Usable Outdoor Temp (65⁰) ▶

Free Cooling shuts off above this outdoor temperature. (40 - 80 degrees F)

• Mechanical Cooling? - NO

• Mechanical Cooling? - YES ✓

If you don't have a compressor, set Mechanical Cooling to "NO", Y1 will then be used to control the Free Cooling Damper(s) and Y2 will be disabled. If set to "YES", mechanical (compressor) cooling will be controlled by the Y2 terminal. The number of Cooling Stages must be set to "2" for Mechanical Cooling to work.

For Free Cooling to be energized, the outdoor temperature must be at least 3 degrees below the cool setpoint. Mechanical air conditioning is turned on when the outdoor temperature is above the Usable Outdoor Temp setting or with a 2nd stage demand for cooling. **Note:** Only single stage cooling and single stage heat pumps are supported.

Page 35
• **Installation Settings** ▶   (Continued)

• **Heat Pump Settings** ▶   (Only available when dip switch is set for Heat Pump operation.)

• **Heat Pump Lockout - DISABLED** ▶

• **Heat Pump Lockout - ENABLED** ✔

Turns on Heat Pump Lockout.

• **HP Lockout Outdoor Temp**   **(65°)** ▶

Heat Pump will not run below this temp. (0 - 75 deg. F)

• **Aux Heat Lockout - DISABLED** ▶

• **Aux Heat Lockout - ENABLED** ✔

Turns on Aux Heat Lockout.

• **Aux Heat Lockout Temp**   **(65°)** ▶

Aux Heat will not run above this temp. (20 - 75 deg. F) **GAS/EL or HP** dip switch must be set for **HP** and **GAS or ELEC** dip switch must be set for **ELEC**. Aux Heat will always be 5° higher than the Heat Pump Lockout Temp.

• **Dual Fuel Settings** ▶

This feature is for heat pump applications only.
This will only appear if the **GAS/EL or HP** dip switch is set for **HP** and the **GAS or ELEC** dip switch is set for **Gas**.

When Dual Fuel is ON, an outdoor temperature or a demand for third stage heat will be used to stop running the heat pump and switch to a fossil fuel source of heat. **NOTE:** Once the change to fossil fuel is made, the heat demand must finish with fossil fuel. Additional heat demands within 10 minutes will also use fossil fuel, regardless of outdoor temperature or stage demand.

- • **Dual Fuel - ON/OFF**
- • **Changeover With Outdoor - ON/OFF**
  Uses outdoor sensor for changeover.
- • **Adjust Balance Point**
  Choose the temperature for changeover to fossil fuel. (0 - 60 deg. F)

Page 36

- **Installation Settings** ▶   (Continued)

• Fan Off Delay   (0s) ▶

Runs the fan for a short time after Cooling or electric strip heat turns off to increase system efficiency. (0 - 120 Secs.)

• Calibrate Sensors ▶

The thermostat sensor may be calibrated -7 to +7 degrees F.

- **Outdoor Sensor**   (0°) ▶

The outdoor sensor may be calibrated -7 to +7 degrees F.

• Test Outputs ▶

The installer or service technician can use this feature to test the functions without any time delays of the thermostat and heating and cooling equipment.

With a 1st stage cooling call, Y1 and G are active

Page 37

• Dealer Information ▶

The Dealer may enter their company contact information for the customer to use when they need service. This will appear in the "Who To Call For Service" button is pressed in the Information Menu.

Press the buttons below and use the keyboard to enter your information
• Dealer Name ▶

• Contact Name ▶

• Dealer Phone ▶

• Dealer Email ▶

• Dealer Website ▶

Please use TouchScreen Assistant to add Dealer's logo. (See Page 40)

• Factory Defaults ▶

Press to reset the thermostat back to the factory settings.

• Delete Custom Images ▶

Press to delete the custom photos you uploaded to the thermostat.

• Upgrade Firmware ▶

Press to upgrade the thermostat firmware. The SD Card must be in the thermostat SD Card reader and contain the valid firmware. If an error message appears, confirm with TouchScreen Assistant that firmware is up to date or simply try reinserting the SD card.

Emergency Heat

The Emergency Heat function is only available if your thermostat is set to control a Heat Pump.

To initiate the Emergency Heat feature, Press the Emergency Heat button. During Emergency Heat operation the thermostat will turn on the fan and auxiliary stages of heat when there is a demand for heat. The 1st stage of heating and all stages of cooling will be unavailable. To exit Emergency Heat, press the Emergency Heat button.
TouchScreen Assistant

TouchScreen Assistant may be downloaded at no charge at:

www.goodmanthermostats.com/thermostats/touchscreen

Every time the user runs the TouchScreen Assistant software, it automatically connects to the TouchScreen Web site in the background and updates the software and firmware (the operating system for TouchScreen) at no cost.

The TouchScreen Assistant allows you to use your computer to:

- **Upload photos for background and slideshow images**

- **Program a time period schedule**

- **Configure installation settings**

- **Upload dealer and service contact information and company logo**

- **Update thermostat firmware**

TouchScreen Assistant

Uploading Photos and Settings to your thermostat

When you are finished adding and editing photos and settings, click on **Save to SD.** When prompted, remove the SD card from the SD card reader on your computer.

Save to SD

*NOTE: A 2GB SD card is recommended.

At the thermostat:

Insert the SD card into the SD Card Slot.

Press MENU then ▼

SD Card
Slot

Next, press

Settings

Press • SD Card ▶

Then, press • Import Settings from SD Card ▶

Select the items to import to your thermostat then press NEXT ▶

Your thermostat will automatically save your new photos and settings.

Installation Instructions

Remove & Replace the Old Thermostat

To install the thermostat properly, please follow these step by step instructions. If you are unsure about any of these steps, call a qualified technician for assistance.

► Assemble tools: Flat blade screwdriver, wire cutters and wire strippers.
► Make sure your Heater/Air Conditioner is working properly before beginning installation of the thermostat.

► Carefully unpack the thermostat. Save the screws, any brackets, and instructions.

► Turn off the power to the Heating/Air Conditioning system at the main fuse panel. Most residential systems have a separate breaker for disconnecting power to the furnace.

► Remove the cover of the old thermostat. If it does not come off easily, check for screws.

► Loosen the screws holding the thermostat base or subbase to the wall and lift away.

► Disconnect the wires from the old thermostat. Tape the ends of the wires as you disconnect them, and mark them with the letter of the terminal for easy reconnection to the new thermostat.

► Keep the old thermostat for reference purposes, until your new thermostat is functioning properly.

Page 42

Installation Instructions

Wire Connections

If the terminal designations on your old thermostat do not match those on the new thermostat, *refer to the chart below or the wiring diagrams that follow.*

Wire from the old thermostat terminal marked	Function	Install on the new thermostat connector marked
G or F	Fan	G
Y1, Y or C	Cooling	Y1
W1, W or H	Heating	W1/O/B
Rh, R, M, Vr, A	Power	R
C	Common	C
O/B	Rev. Valve	W1/O/B*
W2	2nd Stage Heat	W2
Y2	2nd Stage Cooling	Y2
W3	3rd Stage Heat	W3
OUT -	Outdoor Sensor	OUTDOOR
OUT +	Outdoor Sensor	OUTDOOR

* O/B is used if your system is a Heat Pump.

Installation Instructions

The TouchScreen Thermostat Backplate
To remove the thermostat backplate:
Using the Finger Pull Areas, pull the front
housing away from the backplate.

Backplate

Front Housing
Look for these tabs to locate the pull areas
Pull out with thumbs in these areas

W3	3rd stage heat circuit	**G**	Fan relay
W2	2nd stage heat circuit	**R**	24 VAC return
W1/O/B	1st stage heat circuit/reversing valve	**C**	24 VAC common
Y2	2nd stage compressor relay	**OUTDOOR**	Outdoor sensor connections
Y1	1st stage compressor relay		

**IMPORTANT: This thermostat requires _both_
R (24 VAC Return) and C (24 VAC Common) be
connected to the backplate terminals.**

Installation Instructions

Explanation of Thermostat Dip Switches

Dip switches are located on the back of the thermostat
This dip switch configures the thermostat to control a conventional gas/electric system or a heat pump. If your system is anything other than a heat pump, leave this switch set for GAS/EL.*
*For some commercial heat pumps, this switch may need to be set for GAS/EL. Consult the commercial heat pump literature.

When the <u>GAS/EL or HP</u> dip switch is configured for HP, this dip switch (O or B) must be set to control the appropriate reversing valve. If O is chosen, the W1/O/B terminal will energize in cooling. If B is chosen, the W1/O/B terminal will energize in heating.

---

*When <u>GAS/EL or HP</u> is set for <u>GAS/EL</u>:
This switch (GAS or ELEC) controls how the thermostat will control the Fan (G) terminal in heating mode. When <u>GAS</u> is chosen, the thermostat <u>will not</u> energize the Fan (G) terminal in heating. When <u>ELEC</u> is chosen the thermostat <u>will</u> energize the fan in heating.

*When <u>GAS/EL or HP</u> is set for <u>HP</u>:
This switch (GAS or ELEC) defines the Aux Heat type. When <u>GAS</u> is chosen, the auxiliary heat will not be allowed to run during heat pump operation. When using a Dual Fuel system, set this switch for <u>GAS</u>. When <u>ELEC</u> is chosen, up to two stages of auxiliary strip heat will be allowed to run.

Sample Wiring Diagrams

Free Cooling
Free Cooling utilizes the Y1 terminal for the operation of 1st stage cooling. If mechanical (compressor) cooling is also present, the mechanical cooling (or heat pump compressor) is connected to the Y2 terminal in this instance.

Free Cooling may be used with a Gas/Electric or Heat Pump system.

Outdoor Sensor: TSTATGTAC-OS Temperature Sensor 10K ohm sensor at 77F/25C. Negative Temperature Coefficient.

Troubleshooting

▶ **SYMPTOM:** The air conditioning does not attempt to turn on.
CAUSE: The compressor timer lockout may prevent the air conditioner from turning on for a period of time.
REMEDY: Adjust the Compressor Min. Off Time to "None".

▶ **SYMPTOM:** The display is blank.
CAUSE: Lack of proper power.
REMEDY: Make sure the power is on to the furnace and that you have 24vac between **R** & **C**.

▶ **SYMPTOM:** The air conditioning does not attempt to turn on.
CAUSE: The cooling setpoint is set too high.
REMEDY: Lower the cooling setpoint or lower the cooling setpoint limit. See Setpoint Limits (page 25).

▶ **SYMPTOM:** The heating does not attempt to turn on.
CAUSE: The heating setpoint is set too low.
REMEDY: Raise the heating setpoint or raise the heating setpoint limit. See Setpoint Limits (page 25).

▶ **SYMPTOM:** When controlling a residential heat pump, and asking for cooling, the heat comes on.
CAUSE: The thermostat reversing valve dip switch is set for **"B".**
REMEDY: Set the reversing valve dip switch for **"O".**

▶ **SYMPTOM:** When calling for cooling, both the heat and cool come on.
CAUSE: The thermostat equipment dip switch is configured for **"HP"** and the HVAC unit is a Gas/Electric.
REMEDY: Set the equipment dip switch for **"Gas".**

Notes:

Warranty

One-Year Warranty - This Product is warranted to be free from defects in material and workmanship. If it appears within one year from the date of original installation, whether or not actual use begins on that date, that the product does not meet this warranty, a new or remanufactured part, at the manufacturer's sole option to replace any defective part, will be provided without charge for the part itself provided the defective part is returned to the distributor through a qualified servicing dealer.

THIS WARRANTY DOES NOT INCLUDE LABOR OR OTHER COSTS incurred for diagnosing, repairing, removing, installing, shipping, servicing or handling of either defective parts or replacement parts. Such costs may be covered by a separate warranty provided by the installer.

THIS WARRANTY APPLIES ONLY TO PRODUCTS IN THEIR ORIGINAL INSTALLATION LOCATION AND BECOMES VOID UPON REINSTALLATION.

LIMITATIONS OF WARRANTIES – ALL IMPLIED WARRANTIES (INCLUDING IMPLIED WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND MERCHANTABILITY) ARE HEREBY LIMITED IN DURATION TO THE PERIOD FOR WHICH THE LIMITED WARRANTY IS GIVEN. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE MAY NOT APPLY TO YOU. THE EXPRESSED WARRANTIES MADE IN THIS WARRANTY ARE EXCLUSIVE AND MAY NOT BE ALTERED, ENLARGED, OR CHANGED BY ANY DISTRIBUTOR, DEALER, OR OTHER PERSON WHATSOEVER.

ALL WORK UNDER THE TERMS OF THIS WARRANTY SHALL BE PERFORMED DURING NORMAL WORKING HOURS. ALL REPLACEMENT PARTS, WHETHER NEW OR REMANUFACTURED, ASSUME AS THEIR WARRANTY PERIOD ONLY THE REMAINING TIME PERIOD OF THIS WARRANTY.

THE MANUFACTURER WILL NOT BE RESPONSIBLE FOR:
1. Normal maintenance as outlined in the installation and servicing instructions or owner's manual, including filter cleaning and/or replacement and lubrication.
2. Damage or repairs required as a consequence of faulty installation, misapplication, abuse, improper servicing, unauthorized alteration or improper operation.
3. Failure to start due to voltage conditions, blown fuses, open circuit breakers or other damages due to the inadequacy or interruption of electrical service.
4. Damage as a result of floods, winds, fires, lightning, accidents, corrosive environments or other conditions beyond the control of the Manufacturer.
5. Parts not supplied or designated by the Manufacturer, or damages resulting from their use.
6. Manufacturer products installed outside the continental U.S.A., Alaska, Hawaii, and Canada.
7. Electricity or fuel costs or increases in electricity or fuel costs for any reason whatsoever including additional or unusual use of supplemental electric heat.
8. ANY SPECIAL INDIRECT OR CONSEQUENTIAL PROPERTY OR COMMERCIAL DAMAGE OF ANY NATURE WHATSOEVER. Some states do not allow the exclusion of incidental or consequential damages, so the above may not apply to you.

This warranty gives you specific legal rights and you may also have other rights which may vary from state to state.
