

**AN ATTRACTIVE, LARGE-SCREEN
CHOICE THAT LOOKS GREAT
AND SAVES ENERGY.**

**Good Looks.
Great Features.**

Meet all your commercial application needs with one brand — Honeywell.

For your commercial customers who don't need the sophistication of the T7350 or the touchscreen programming of the Commercial VisionPRO™ 8000, the Honeywell CommercialPRO™ 7000 is a great choice. Perfect for smaller commercial settings such as restaurants, banks, small businesses and more, the CommercialPRO 7000 features a display that's twice the size of competitive thermostats while still maintaining a sleek, slim body. So along with the energy savings your customers will enjoy from the CommercialPRO 7000's menu-driven programming, they'll also appreciate its stylish look on their walls.

Value-Priced. Feature-Rich.

The CommercialPRO 7000 offers you and your customers great value. The combination of easy installation, reliability and accuracy saves you time and reduces callbacks. And the features ranging from energy savings to Title 24 compliance to holiday setback options will definitely please your commercial customers.
